Players of various nations gather around one place, laugh, share, learn, play poker in harmony in one mighty world of online poker. The harmony makes their friendship stronger? well, this is something that sounds all sweet and candy. Remember, there is harmony only in the fact that every player will be following the same rules, there is lot of competition in an online poker sphere, there is an air of friendship in online poker when you play poker with the same peers for quite long, but competition comes first, than friendship.

However, when you understand that games are different from friendship you can enjoy a harmonious competition leading to money and glory sometimes and sometimes to loss and recovery at times.

The most important thing that energizes everyone to play poker games is the players who are their peers also encourage them to play more, and some of them warn ?it is a bad day for you guy, better take a break and start tomorrow?

Friends when you play poker are not those who encourage you to keep playing, but they are also those who tell you when you are overdosed with poker and they warn you that it is time to stop!
